EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Ward on May 17, 2004.

The application has been amended as follows:

On page 1 of the specification, the sentence before the Background of the Invention section has been amended as follows:

--This application is a divisional application of U.S. Application Ser. No. 09/312,542, filed May 14, 1999, which is now U.S. Patent No. 6,281,145.--

On page 9 of the specification, line 2, "inverters" has been changed to --inventors'--.

2. The following is an examiner's statement of reasons for allowance:

The claims as amended are allowable over the prior art of Hasebe et al. (US 5,658,615) because while Hasebe et al. discloses supplying different types of process solutions to a substrate, Hasebe et al. does not recognize that each different process solution has its own supply rate at which a uniform coating is achieved. Further, while Hasebe et al. teaches controlling the supply rate of a process solution, Hasebe et al. does not control the supply rate specific to each

Art Unit: 1762

process solution. Hasebe et al. controls each process solution in the same manner. The prior art, including Hasebe et al., does not teach or fairly suggest determining for each of different process solutions a supply rate at which a uniform thickness is achieved; storing reference data representing relationships between the process solutions and supply rates determined for the same in the storage section; and supplying the process solution at the corresponding supply rate for the selected process solution to the substrate in a spin coating process as claimed in claims 26 and 32.

The Examiner raised the question of support for the newly-added limitation "searching the reference data, by the controller, for a corresponding supply rate prescribed for the selected process solution" in lines 23-24 of claim 26 and lines 28-29 of claim 32. The Examiner and Applicant agreed that searching reference data is a typical action performed when a controller reads data from a data storage section as disclosed on page 15, lines 2-4, of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kirsten C Jolley whose telephone number is 571-272-1421. The examiner can normally be reached on Monday to Thursday and every other Friday.
